

## Boom-Mix Foam Generation System

For Big Booms and  
High Speed Spraying

**Precision molded  
foamheads are  
highly versatile  
and fully  
serviceable.**

High Performance  
Foam Generation

### Designed For Large Custom Application Machines

- Nearly Instant Foam Side Switching
- Convenient, In-Cab Control
- Low Maintenance
- Quality Components

8 to 10 GPM  
Foam Output

---

Unlimited  
Boom Length

---

Use with Field  
Speeds of  
8 - 20 mph

**Innovative  
Spraying  
Accessories  
Since 1973.**

# BOOM TRACKER™ Options Available

**Operating Source:** Diaphragm Compressor (BTD), Rotary Vane Compressor (BTR) or On-Board-Air (BTN)

**Foam Delivery:** Collector Deflectors™ and Foam Streamers™ standard on BTR and BTN Models, Collector Heads™ and Foam Streamers™ standard on BTD Models

BTD Foamhead

**Tank Capacities:** 6, 10, 13, 25, 40  
40 gallon tank available only in BTR and BTN models

**Standard With All Boom Tracker Models:** In-cab control box with on/off and left/right foam switching, fully serviceable boom mounted foamhead. BTR and BTN models have in-cab foam frequency adjustment. BTR model has boom mounted air acutated diaphragm valve for nearly instant foam side switching.

## Complete Listing of Richway Foam Marker Options

Mini Trac™, Trac Master™, Boom Tracker™, Versa Trac™, Trac Rite™

### Operating Sources:

Diaphragm Compressor- 12 volt, dc  
Rotary Vane Compressor- 12 volt, dc - fully rebuildable  
On-Board-Air (OBA) - uses the existing vehicle air source  
High Output Diaphragm Compressor- 12 volt, dc

### Tank Capacities:

3, 4.5, 6, 10, 13, 17, 25, and 40 gallon high density rotationally molded poly tanks. All with 4" easy fill tank cap.

### Steel Components:

All models available powder coated or stainless steel.

**Foam Delivery:** Highly visible, neon orange, molded plastic boom end assemblies:

#### Collector Heads™

Provide longer foam life on bare ground and during no-till applications.

#### Collector Deflectors™

Larger than Collector Heads for maximum wind and drift protection.

#### Foam Streamers™

Produce a nearly constant foam stream, lays on top of crop when post-emerge spraying.
