TRACRITE™

INTEGRATED
TECHNOLOGY

Options Available

TRD-2040: For small turf & pasture applications. Includes components for 10-45' booms.

TRD-2100 & TRD-2170: Designed and includes components for up to 60' booms.

TRD-2250: For larger booms (up to 90') and higher field speeds. Includes Collector Deflectors™.

Operating Source: 12 Volt DC Diaphragm Compressor and Peristaltic Liquid Pump.

Tank Capacity: 4, 10, 17, & 25 Gallon Poly tank with a 4" easy fill cap.

Self cleaning liquid filter in tank.

Mounting: (4) 3/8" machine screw inserts molded into the tank bottom

Foamheads: Richway's exclusive, fully serviceable boom mounted foamheads provide consistent quality foam. Our standard foamheads are easy to clean.

Foam Delivery: Collector Heads™ or Collector Deflectors™ and Foam Streamers™ included with every unit.

Collector Heads™

Included with 4, 10, & 17 gallon units.

Provides longer foam life on bare ground & during no-till applications.

Collector Deflectors™

Included with 25 gallon unit. Longer

bodied collector head allows for a larger foam drop before being affected by wind.

Flow Control: Foam Adjustment Valve is mounted on the power unit for control of drop frequency.

Standard With Trac Rite™: In-cab control with on/off and left/right foam switching.

Single drop models are also available with any tank capacity.
